

## Table of Contents

Suggestions for the Day of the Exam .....	5
Multiple Choice Test Taking Strategies .....	6
Strategies for the New York State Teacher Certification Examination .....	7
Constructed-Response Assignment .....	10
The New York State Teacher Certification Examination: General Information .....	11
Learner-Centered Proficiencies .....	12
Cooperative Learning.....	13
Bloom’s Taxonomy of Levels of Thinking .....	14
New York State Code of Ethics for Educators .....	15
Background on the Development of the Code.....	17
Test Competencies: Mathematics (#04).....	18
Discussion of Competencies .....	24
<b>Competency 0001</b> —Understand the reasoning process, including inductive and deductive logic and symbolic logic.....	24
<b>Competency 0002</b> —Understand the meaning of mathematical concepts and symbols and how to communicate mathematical ideas in writing .....	27
<b>Competency 0003</b> —Understand mathematical modeling and apply multiple mathematical representations to connect mathematical ideas and solve problems .....	28
<b>Competency 0004</b> —Understand principles and properties of the set of complex numbers and its subsets.....	31
<b>Competency 0005</b> —Understand the principles and properties of patterns and algebraic operations and relations .....	41
<b>Competency 0006</b> —Understand the properties of linear functions and relations .....	47
<b>Competency 0007</b> —Understand the properties of quadratic and higher-order polynomial functions and relations.....	51
<b>Competency 0008</b> —Understand the properties of rational, radical, and absolute value functions and relations .....	63
<b>Competency 0009</b> —Understand the properties of exponential and logarithmic functions..	68
<b>Competency 0010</b> —Understand principles, properties, and relationships involving trigonometric functions and their associated geometric representations .....	74
<b>Competency 0011</b> —Apply the principles and techniques of trigonometry to model and solve problems .....	80
<b>Competency 0012</b> —Demonstrate an understanding of the fundamental concepts of calculus .....	81
<b>Competency 0013</b> —Apply the principles and techniques of calculus to model and solve problems .....	86
<b>Competency 0014</b> —Understand and apply measurement principles .....	88
<b>Competency 0015</b> —Understand the principles and properties of axiomatic (synthetic) geometries.....	93
<b>Competency 0016</b> —Understand the principles and properties of coordinate geometry .....	99
<b>Competency 0017</b> —Apply mathematical principles and techniques to model and solve problems involving vector and transformational geometries .....	1012
<b>Competency 0018</b> —Understand the principles, properties, and techniques related to sequence, series, summation, and counting strategies and their applications to problem solving.....	104

<b>Competency 0019</b> —Understand the principles, properties, and techniques of probability and their applications.....	108
<b>Competency 0020</b> —Understand the principles, properties, and techniques of data analysis and statistics .....	118
<b>Competency 0021</b> —Understand how techniques of discrete mathematics (e.g., diagrams, graphs, matrices, propositional statements) are applied in the analysis, interpretation, communication, and solution of problems .....	123
Formulas and Definitions Chart for Mathematics 8-12 .....	125
Sample Constructed-Response Assignment .....	127
Sample Problems .....	132
Answers and Solutions to Sample Problems .....	146
References.....	149
Glossary and Index .....	151
